

Figure 280—Nose Gun Installations

(3) TOP TURRET.—The top gun turret is installed in the rear of the pilot's compartment. This is a Sperry No. 645473 power-operated, direct-sighted twin .50-caliber flexible gun installation. Ammunition boxes for 500 rounds per gun are attached to the turret.

(4) RADIO COMPARTMENT GUN.—One flexible .50-caliber gun is mounted in the hatch above the

radio compartment. The gun and mount are stowed in the compartment ceiling by means of a sliding gun track. (See figure 281A.)

(5) SIDE GUNS.—The side gun installation is a single flexible .50 caliber gun mounted on each side of the airplane. Each gun is supplied with 500 rounds of ammunition. (See figure 281B.)
